

Welcome to the neighborhood!

We hope that you are getting settled into your new home and wanted to take a moment to introduce ourselves to you.

Bedford 2030 is a local non-profit that focuses on community climate action. We know that climate change is one of the most pressing issues of our time, and we believe that we must face it together. We are dedicated to working with all members of our community to help find and share ways that we can incorporate sustainability into our daily lives and advocate for change at larger scales.

We have set the ambitious goal of reducing our town's carbon emissions 80% by 2030 - we won't be able to turn this vision into reality on our own.

It can be challenging to figure out where to start, which is why we're here. Whether you are interested in composting, have questions about recycling, are considering buying an electric vehicle, or want to learn about making your home more energy efficient - we are here for you.

Our office is located at 68 Bedford Road in Katonah (in the St. Luke's parish house). You can also call as at (914) 620-2411 or email us at info@bedford2030.org. We look forward to connecting with you and exploring the ways we can work together to improve life in this town that we love so much.

Again, welcome! We're glad you're here.

Sincerely,
The Bedford 2030 Team
